PRE-REQUISITES

Project Objectives

Team ID	PNT2022TMID25845
Project Name	University Admit Eligibility Predictor

Objectives :

University Admission Predictor System is a web based application system in which students can register their marks along with their personal information. This helps to predict their admissions in universities. Administrators can add the University details and the batch details. It helps students to make the right decisions for choosing their University. In which students can register with their personal as well as marks details to predict the admission in universities.

University admission predictor is a boon to many students. This helps the student not only to help in filling out the application forms but also give the students an idea about their future University by calculating their cut off.

When students come from rural places, they find it hard to go along with the formal procedures. So, this application helps them a lot and eases out their fear. Whatever may be their scores , this application helps to find the best university . Hence, our proposed computer aided system will help the students to get the list of all universities in which they could get the prediction about their admission at the click of a button.

With this application, the students can very easily obtain the list of universities even branch wise and course wise. This will not only make the admission process easy but also minimizes stress for students. The main objective of our system is to make the right choice of University.
